

Following are the minimum and recommended requirements for the Phoenix³² Server computer:

Processor	Minimum:	Intel Pentium III 800 MHz or equivalent
	Recommended:	Intel Pentium IV 4 GHz+ or equivalent
Memory	Minimum:	128 megabytes
	Recommended:	1024+ megabytes
Hard Drive	Minimum:	6 gigabyte
	Recommended:	80+ gigabyte
Operating System	Minimum:	Windows XP Professional
	Recommended:	Windows XP Professional (Windows 2000 or Windows 2003 Server is acceptable)
CD-ROM	Minimum:	4X
	Recommended:	52X+
Other requirements		10/100 LAN PC Card Video Card capable of 800x600 resolution (1280 x 1024 recommended) Monitor capable of max video card resolution Standard keyboard and mouse 3.5" floppy disk drive (recommended)

Inclusion of a dedicated router for communication between the Phoenix Server and the NetLinx ME-260 is strongly recommended but not required. Without the local router, Phoenix may be adversely affected by network outages or bottlenecks. The dedicated router should be a 4-port LinkSys or equivalent. 10/100 is acceptable, but gigabit is preferred.
